## **IMPORTANT INFORMATION**

**Fitting requires cutting and drilling of bodywork. Template is provided as a guide only, please double check position of any holes required before cutting. The fitter and driver should check all connections to snorkel and original air intake components are watertight before every use. Use a suitable automotive grade sealant where appropriate. This item does not reduce the need for careful and responsible driving in all conditions. Remember, driving through deep water is dangerous and can lead to extensive damage to vehicles, personal injury or death and should only be attempted by properly trained personnel. Water ingress into an engine can cause substantial damage. Alien and it's distributors can accept no liability for incidents involving vehicles using this product.**
